ment pays no interest. My opinion is, that public and private benefit, is obvious. It is as unof 6 per cent interest. As far as it could be thus of coin for currency, particularly while owing a for-

unsalable at par at 7 P cent. In devising a more permanent plan for the man-

upon it. It is, so to speak, the personification of commercial values. It is the standard and measure foreign coins as have been legalized by Congress, constitute the money, as thus defined, of the United

All uses and purposes of money may be arranged B under the following four heads:

First: It is a standard of value. For this pur-

other commedity, do change in value.

The first effect on the price of the precious metals, in using them for money, is to enhance their value: the ultimate effect may be to diminish their value. It may so stimulate their production as to increase the quantity beyond the demand for coining. They are less valuable now than they were in former ages they might or might not be so had they never been used for money. The tendency is still in the same direction. But we can guard against the effect of change in the value of money as well as we can against the effect of change in the value of money as well as we can against the effect of change in the value of money as well as we can against the effect of change in the value of money as well as we can against the effect of change in the price of other commodities; they are essentially the same, they are less against the effect of change in the price of other commodities; they are essentially the same, they are less against the effect of change in the price of other commodities; they are essentially the same, they are less against the effect of change in the price of other commodities; they are essentially the same, they are less against the effect of change in the price of other commodities; they are essentially the same, they are less against the effect of change in the price of other commodities; they are essentially the same, they are less against the effect of change in the price of other commodities.

Lighther—The market is dull and inactive, but addit and inactive, but addit and inactive, but all the market is dull and inactive, but all the extreme static dull and inactive, but all the extreme static dull and inactive, but all the extreme sta change in the value of money as Well as we can against the effect of change in the price of other commodities; they are essentially the same, they are lemoid figures. Could place the form of the proper subjects for gittimate matters of risk and not proper subjects for the form of the proper subjects for gittimate matters of risk and not proper subjects for the form of the proper subjects for the proper subjects

market, and aid in sustaining the prices of all Government securities. This currency, when again converted, would be into a 6 \$\psi\$ cent stock, thus making a saving to Government of 1.30 \$\psi\$ cent in the interest, and extending the maturity to twenty years.

The money market continues very easy, and in gold loans have been made as low as 4 \$\psi\$ cent. The par of coin, and, in connection with other proper measures, it would probably enable it to borrow upon its funded debt at par, at 6 P cent interest, if and abundance of commodities of commerce, foreign and abundance of commerce, foreign and abundance of commodities of commerce, foreign and abundance of commerce, foreign The Secretary, in his December report, estimated as well as domestic; and to moderate prices, the Stockless making three millions received. Some of the Boston banks are sending their stock here for sale.

In view of the enormous expenditures of the Govmand and supply, which Governments influence but on the loan still due the Government would furnish an outlet for the notes. Some of our banks tions—in view of collecting \$150,000,000 annually quantity of money; the more we can obtain of this according to the loan still due the Government would furnish an outlet for the notes. Some of our banks tions—in view of collecting \$150,000,000 annually quantity of money; the more we can obtain of this according to the loan still due the Government would furnish an outlet for the notes. ermment, and principally for home abor and principally for home ab still refuse to receive the Government currency on by direct taxation, besides other revenues to be coldeposit, even to the extent sufficient to meet the lected by Government—in view of the disordered can spare, or produce it among ourselves. A redundof the loyal States, a large amount—\$200,000,000 or the few, but it will benefit the many; a scarcity may more—of the demand notes of the Government could be an advantage to the few to the certain injury of
